How does the Direct Solar Unlimited plan work?

[Watch the video to learn more](#)

Start getting more from your solar panels with these 3 easy steps:

1. Connect your solar system: You'll need a qualifying solar energy system with a rated capacity of less than 50 kW, plus an existing interconnection agreement with your [TDSP \(utility provider\)](#).
2. Configure your meter: Contact your TDSP to configure your meter and get connected to the grid.
3. Enroll in Direct Solar Unlimited: Sign up for Direct Solar Unlimited and enjoy unlimited bill credits for the extra energy your solar panels produce. Plus, get a fixed electricity rate for the length of your contract.**

Who can sign up for the Direct Solar Unlimited plan?	▼
What is extra (or surplus) energy?	▼
Who do I contact about connecting to the grid and setting up my meter?	▼
Do I need a special meter?	▼
Is there a limit on how many bill credits I can earn?	▼
Do my credits transfer if I switch plans?	▼
How do I sign up?	▼

Terms and conditions ^

¹ The credit is exclusive of any monthly base charge, applicable taxes and fees, or other charges. Credits for extra energy are uncapped. The credit per kWh for the extra energy you send to the grid will be the same as the kWh energy rate we charge for the plan. It may take up to 3 billing cycles after receiving Permission to Operate (PTO) from your utility to begin receiving credits. To receive bill credits, the customer must have solar panels at the utility service address and an active interconnection agreement with the utility (or TDSP). Customer must have a meter installed and configured by their TDSP that measures the inflow and outflow of electricity to and from their home.

² The only circumstance in which your actual price can change is to reflect changes in Transmission and Distribution Service Provider (TDSP) Delivery Charges, law or regulatory charges allowed by the Public Utility Commission of Texas.

Consumer Information Regarding Solar Panels: The Public Utility Commission of Texas has posted a guide to help consumers with information concerning solar panels. It is accessible at: <https://www.puc.texas.gov/consumer-help/electricity/solar/>.
